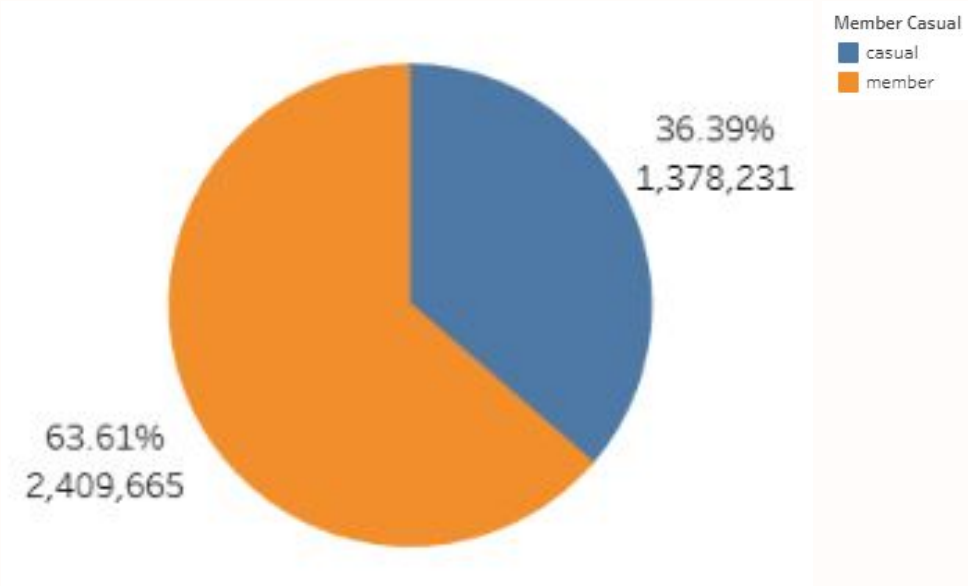
How do Annual Members and Casual Riders use Bikeshare differently?

Courtney Speight

Date: January 2026

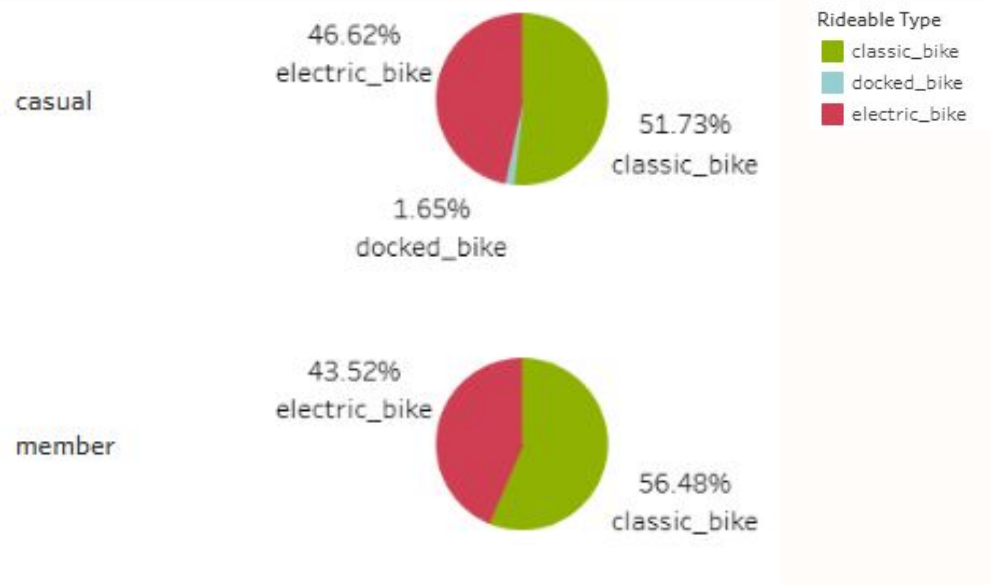
Casual Riders vs Annual Members



The majority of Cyclistic users are annual members however there is still a lot of people that have been using the service as casual riders.

The business goal is to market towards these users and convert them into members.

Types of Bikes

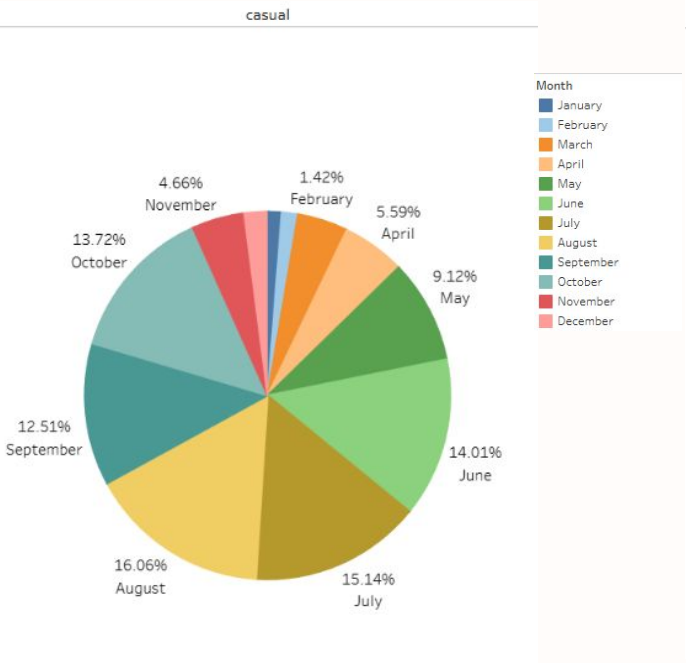


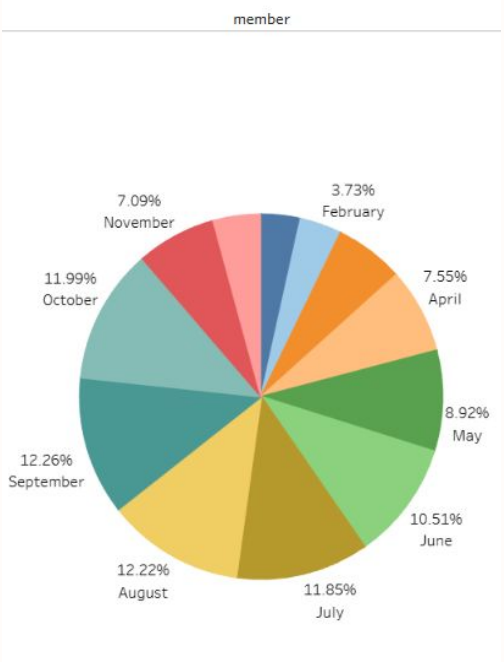
Both users prefer the classic bikes over the electric bikes.

The docked bikes however are only used by casual riders and in very small demand.

It could be worth looking into why the docked bikes are so rarely used

Monthly Ride Trends



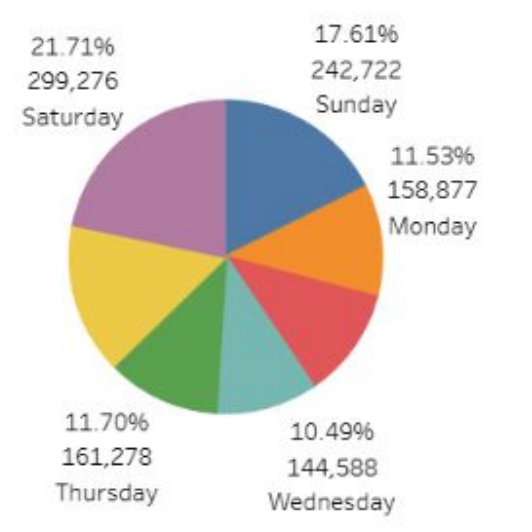


Rides increase for both types of riders during the summer months and dip during the winter months

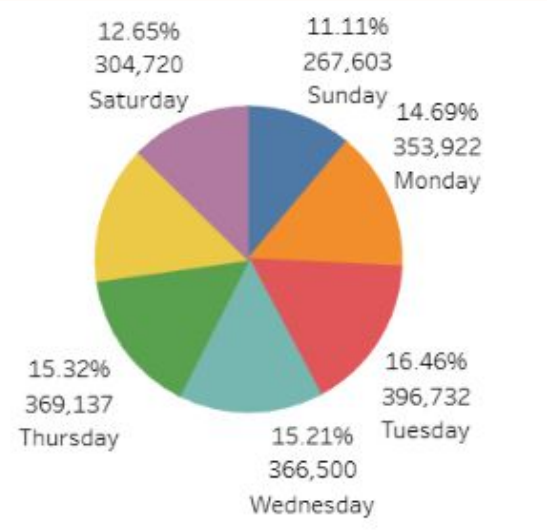
Annual members use the service slightly more frequently during the winter months, this suggests they are more likely using the service to commute to work year round.

Days of the Week Ride Trends

Casual



Member



We can see the difference here that casual riders use the service more often on the weekend and less during the week.

The annual members have a more consistent usage but slightly dips on the weekends.

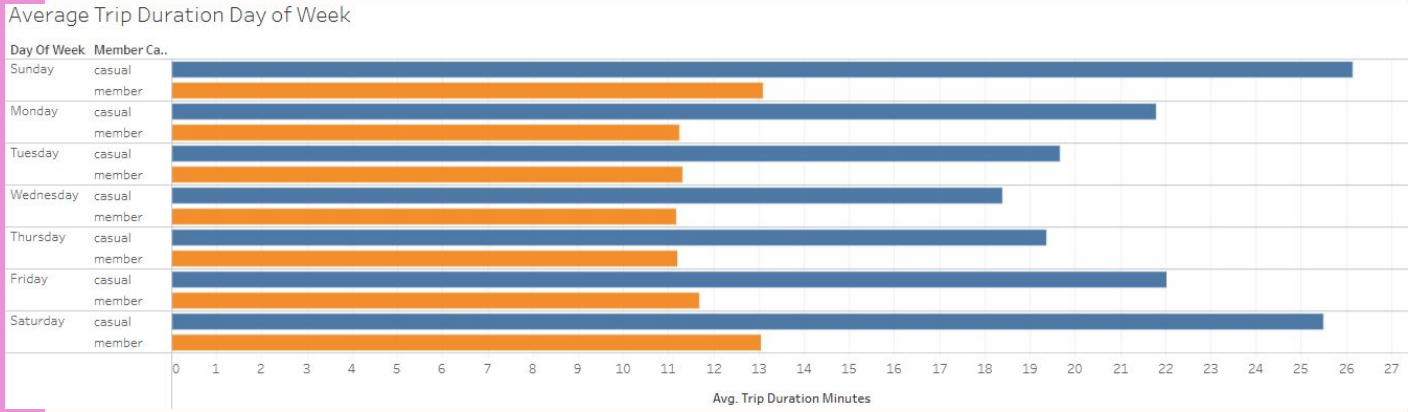
Overall Average Trip Duration

Casual riders have a much higher trip duration than annual members do.

Casual riders average at 22.52 minutes.

Annual members average at 11.73 minutes.

Day of the Week Average Trip Duration



Casual riders have a much higher trip duration on the weekend compared to during the week.

Annual riders remain consistent throughout the week, with slight increased durations over the weekend.

Recommendations

- Create a new type of Annual Membership that could be tailored towards weekend use of the bikes
- Introduce a Monthly Membership option
- Introducing limited-time discounts during the summer months
- Survey the casual riders via email or phone to gain an understanding of why they choose to use the service as a casual rider over being a member, and what would make them more likely to sign up for a membership.

Thank You!
